

## GRAB A “BYTE” AT LUNCH WITH IOT

**MEET MONNIT:** A U.S.-based manufacturer, Monnit makes wireless sensors that monitor what matters most—if something goes wrong, our sensors send an alert. Whether it's a global fast-food chain or a school cafeteria, Monnit's Internet of Things (IoT)solutions track the most valuable assets.

**THE PROBLEM:** Lajuana Wimberley, the Director of Nutrition at the Llano Independent School District, approached Monnit to automate temp checks for her school's walk-in coolers and freezers. Spoilage was commonplace for the cafeteria thanks to power outages, blown fuses, and equipment failure. Just like the meals Lajuana's team serves students, the budget also had to be balanced.

New to the IoT, Lajuana needed guidance to monitor multiple kitchen and cafeteria areas reliably. Monnit Support helped her install an initial small-scale trial to address spoilage. Sensors were mounted outside of the walk-in coolers and freezers; temperature probes were threaded through the door seals.

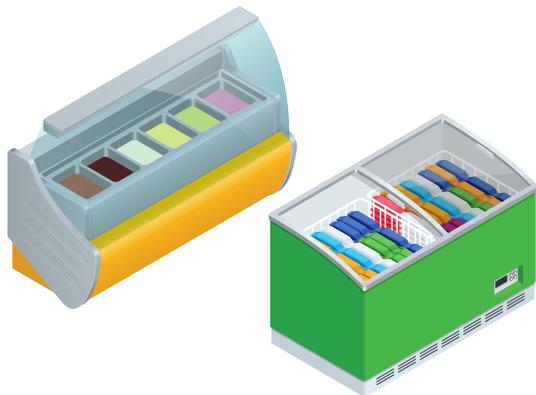

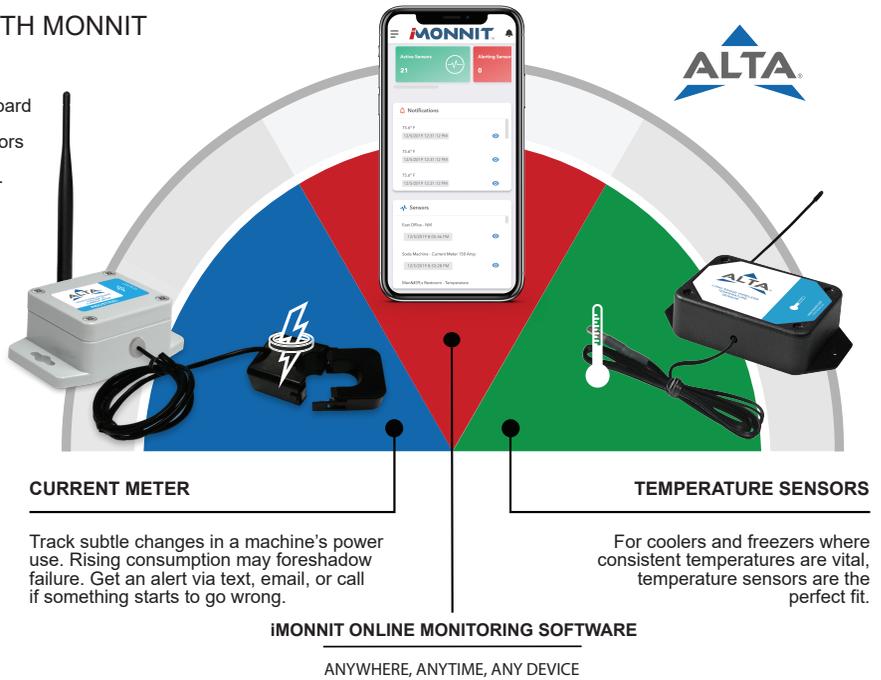

**“ I am impressed with these wireless sensors! They do exactly what we need them to, and have already saved us from a few issues with our walk-in coolers and freezers. ”**

Lajuana Wimberley, Director of Nutrition Llano Independent School District

### THE SOLUTION: A 3-PART DEFENSE WITH MONNIT

Lajuana could now get operational updates in real-time through the iMonnit analytics and sensor management dashboard wherever she was working. Via iMonnit, the temperature sensors were configured to check and record temperatures every hour. Alerts (text or email) were also set up to be issued to staff if temperatures exceeded preset thresholds. Realizing she'd solved a critical operational issue, Lajuana implemented more sensors to monitor her other culinary responsibilities.

For under \$1,000, Lajuana prevented the large-scale failures that had previously cost her school thousands in spoilage. Beyond saving money, she streamlined labor while alleviating her team's day-to-day stresses, freeing them to focus intently on nourishing scholars.

**LESS THAN \$1,000**  
PREVENTS FAILURE & SPOILAGE

# HERE'S HOW IT WORKS

MONNIT

Ready to take control of your business? Let's get you a trial kit.
