

## THE CHECK ENGINE LIGHT™ FOR YOUR SERVER ROOMS & DATA CENTERS

Spanning all sizes, industries, and operations, server rooms and data centers are the backbones of virtually every business. Running a large data center? Or maybe your family-run business has networking equipment in a closet? Either way, protecting your digital assets from unexpected disasters is critical.

**Our Value:** A Monnit Wireless Sensor is the check engine light for server rooms and data centers. If something—such as temperature—changes, Monnit will instantly alert you (or an on-site manager). No matter where you are, Monnit makes sure you know before disaster strikes.

### THE PROBLEM:

"More than 70% of all data center outages are caused by human error." - Uptime Institute

"The average cost of IT downtime is \$5,600 per minute." - Gartner

### THE RISKS:

OVERHEATING

UNEVEN AIRFLOW

TEMPERATURE

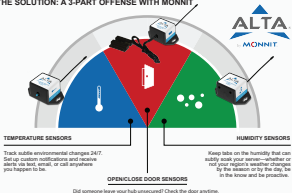

ACCESS

WATER

### THE SOLUTION: A 3-PART OFFENSE WITH MONNIT

## HERE'S HOW IT WORKS

**80+**
