Monnit™ Remote Monitoring Systems for Warehouse Management

Active warehouse monitoring will save companies money while giving managers peace of mind. Monnit wireless sensors can help maintain proper lighting and temperature, as well as protect inventory from water damage. Additionally, sensors can notify you of work activity or potential unauthorized access.

Monnit wireless sensors are a great way to keep an eye on your business without having to preform manual checks.

$ **Identify & Prevent Problems**
Receive real time alerts before small issues turn into big, expensive problems.

🕐 **Save Time and Resources**
Automated system tracks your property for you. Stop wasting time and money doing it yourself!

🛡 **Protect Your Facility**
There is nothing more valuable than your facility - make sure it's protected.

📊 **Regulatory Compliance**
Remote monitoring can help you easily achieve and maintain regulatory compliance. *

✓ **Low Cost & Easy Installation**
Unlike the majority of existing solutions, Monnit sensors are affordable and easy to use.

📱 **Monitor Anywhere, Anytime**
Monitor your store 24/7 via the internet. Android and iOS apps are available, free of charge.

* Monnit wireless sensors track temperatures and other environmental variables.Customer is responsible for understanding regulations specific to their business and determining if Monnit solutions meet their needs.
