

Remote Monitoring for Business

5dBi Omni-directional Dipole Antenna

General Description

Monnit's 5.1 dBi High Gain Rubber Duck Dipole Antenna with RP-SMA Connector offers high performance over 900–930 megahertz (MHz) bands. The dipole antenna's increase in signal or gain is 5.1 decibels relative to an isotropic radiator (dBi).

Measuring 15.56 inches (395mm) long, our 5.1 dBi High Gain Rubber Duck Antenna delivers strong-signal communications in virtually any environment. With an IP65 rating, the antenna is protected from dust ingress and is water-resistant to low-pressure water coming from any direction.

Specifications	
Part Number	MNA-AN-51
Gain	5 (dBi)
VSWR	2.0 max
Length	395mm (15.56 inches)
Polarization	Vertical
Impedance	50 Ω
Antenna Connector	RP-SMA male
Housing Rating	IP65
Frequency Range (MHz)	902 - 928
Weight	45.3g (1.6 oz)
