Monnit, the global IoT industry leader in remote monitoring solutions, is looking for full-time Electrical Engineering Technician with a desire to provide skilled mechanical and electrical support to all areas of manufacturing. This job is located in our corporate headquarters in South Salt Lake. If you are a dynamic self-starter, motivated, like to win, and you're a team player who works well in a collaborative environment, keep reading!

ABOUT MONNIT

Monnit is the global Internet of Things (IoT) industry leader in remote monitoring solutions. We feel our success is directly tied to our amazing team members at all levels. Because of this, we are very careful in selecting exceptional individuals to become part of our team. We provide amazing benefits including health insurance, 401(k) plan, life insurance, bonuses, etc. You will be working in a great team environment, with tons of growth potential.

Our EE Technician conducts debug operations on product and determines requirements to ensure full functionality, and learn new processes, procedures, functions, and best practices in an ever-changing environment. You will follow all applicable documentation, including mechanical drawings, work instructions and/or other supporting documentation. You will work with engineers in conducting experiments and modifying equipment by adding, removing, or altering components as instructed by predetermined processes. You will gain a mastery of Monnit's growing product lines of sensors, gateways and software and intelligently discuss the products through study of the Monnit webpage and other knowledge-based pages available to you. You will need to show the ability to collaborate with internal and external resources, teams, and projects.

Your job also consists of analyzing procedures that control manufacturing process to meet product specifications and quality requirements. You will conduct root cause analysis on failed components and recommend corrective actions. You will also test and evaluate products per test procedure instructions and use hand and small power tools, and various measuring and testing devices to perform job duties.

All members of the Engineering team will provide a detailed focus on execution, maintain professional standards of performance, demeanor, and judgment at all times as detailed in company policy and procedure.

JOB REQUIREMENTS

Monnit will provide on the job training for our products. Here is some of what is required:

High School diploma; Associates Degree in a scientific/technical discipline a strong plus
Minimum of 2 years of technical experience and have an aptitude for technical products
Basic knowledge of electrical components.
Proficient with MS Office Tools, NetSuite
Excellent interpersonal and communication skills
