Production Manager

What You'll Do

Help our highly productive manufacturing department run even better. Do you love finding ways to turn up efficiency while boosting quality? You must be a great communicator, motivator, and organizer. That's who we need to lead production and develop our most important assets—our people.

What We Do

Monnit is a global leader in the Internet of Things (IoT). Be part of a creative and diverse team culture as we build and market connected devices. With our sensors, we connect business-critical things to the Internet and send actionable data to keep people in the know about conditions and performance. Our remote monitoring solutions help people solve problems and improve operations in nearly every industry.

Responsibilities and Duties

- Ensure employees follow industry standard health and safety guidelines.
- Manage and evaluate people and material resources to ensure orders are fulfilled within quality, lead-time, and on-time delivery standards.
- Track and process customer return merchandise authorizations (RMAs).
- Collaborate with and manage 30+ talented employees.
- Actively participate in the implementation of ISO 9001: 2015 certification.
- Establish processes and procedures to minimize manufacturing variances to specifications.
- Continually analyze production processes and recommend/implement improvements.
- Reduce expenses and increase productivity across all product lines.
- Provide leadership, motivation, support, and guidance to our valuable production team.
- Resolve production-related challenges and effectively communicate problems or obstacles.
- Establish workflow policies that enhance speed and efficiency without compromising product quality or integrity.
- Train and educate production staff on proper manufacturing methods (soldering, cable building, tools, ESD handling, etc.).
- Maintain manufacturing area to be 5S-compliant.

Qualifications and Skills

- 5+ years experience in manufacturing operations (preferably in an electronics environment).
- 3+ years experience as a supervisor or lead.
- Excellent project management skills.
- Proven track record of successfully training employees in productivity and safety.
- Working knowledge of OSHA and EPA regulations.
- Ability to coach and mentor employees one-on-one basis and in group settings.
- Experience in an ISO9001 or AS9100 certified manufacturing environment is preferred.
