Senior Software Developer

Do you love engineering our digital world? Are you experienced in building business applications and software systems? Do you enjoy the satisfaction of creating software products that solve customer problems? If so, then Monnit's the place for you.

Who We Are

Join an industry leader. Be part of our diversified team of software development pros passionate about solving business challenges through the transformative power of the Internet of Things (IoT).

We're committed to being the global leader in generating data from the connected things that boost business performance. Monnit provides remote monitoring solutions with 80+ IoT sensors to any business in virtually every industry.

What Will You Build?

Our iMonnit Software is in the cloud, helping people collect and report data from their network of Monnit Sensors. Our sensors connect many things to the IoT like restaurant or laboratory freezers, factory machines, greenhouse lighting systems, and many more.

The iMonnit Sensor Management and Monitoring System is the primary application you'll work on with a dynamic team of software developers in a highly collaborative environment. But you'll also have the opportunity to work in multiple development environments building web, desktop, and mobile applications.

We want you to thrive and own challenging projects, taking them from requirement gathering through deployment.

What More Will You Do?

- Design, implement, and update various software applications.
- Develop and deploy new features and bug fixes.
- Contribute to daily team meetings.
- Be a motivated self-starter focused on execution and results.

Must-Have Qualifications

- 3+ years of experience
- Excellent communication—written and verbal
- C# language
- .Net MVC framework
- HTML

- Javascript
- CSS
- Relational database design

Nice-to-Have Qualifications

- Java language
- NoSQL datastore
- Windows Forms/Java Swing

What's In It For You?

- Stand out individually while collaborating with a team.
- Work a schedule that gives you a great work-life balance.
- Enjoy medical, dental, and vision benefits.
- Invest in yourself with a 401K.

More About Monnit

The origin story of the Internet of Things (IoT) begins with Monnit. Before our inception in 2010, our founder was already at the forefront of embedding technology into machines and devices to make them talk, delivering valuable data to business leaders. After more than a decade, Monnit Remote Monitoring Solutions for virtually any industry use case deliver 25 billion data points in more than 85 countries for 45,000 customers. Monnit's 80+ IoT sensors remotely monitor temperature, light, humidity, water, vibration, and more. You can analyze data using iMonnit cloud software and get alerts via email, text, or call when our sensors detect a change you need to know.

Make a great career move to Monnit—an award-winning IoT company. Apply today at Monnit.com/careers.
