

iMonnit is a cloud based mobile internet platform and central hub for managing Monnit and ALTA products. All data is secured on dedicated servers operating Microsoft SQL Server. This online user interface is where all your device settings can be arranged, supervised, and modified to reflect your unique environment. You can access iMonnit on an internet browser simply by typing www.imonnit.com into the address bar. In addition, you can also download the iMonnit App from to your smartphone or tablet. Start with the basic version or upgrade to iMonnit Premiere to enjoy the full features your Monnit experience can offer.

iMonnit Basic

iMonnit Basic is included for free with all wireless sensors, providing basic features for you to configure and monitor your sensors online. These basic features only support one network and one registered user on an account. More advanced settings, permissions, and actions are available with an upgrade to iMonnit Premiere.

iMonnit Premiere

iMonnit Premiere allows for enhanced functionality of your wireless sensors and includes an advanced software feature set at a low annual cost. All of iMonnit's advanced features are available for configuration. You can have more sensors on your account, support multiple users, and view floor plans for all your sensors (For complete feature comparison see table on the next page).

System Requirements:

- Ethernet gateways require existing Internet connection
- Wireless Sensor Adapter or USB Pro Gateways require a Windows PC or 3rd party IoT gateway

iMonnit Enterprise

iMonnit Enterprise is available for large organizations with specific data usage requirements. It provides the same feature set as the iMonnit Premiere online system while allowing the organization to host and maintain their own sensor data.

System Requirements:

- Minimum System: 2GB RAM, 2.0GHz Processor; Recommended System: 4 GB RAM
- Windows Server 2012 or Newer, Web Server IIS7, ASP.NET 4.5, ASP.Net MVC Framework v.4.0
- SQL Server 2012 or Newer (Database Server)

iMonnit Express

iMonnit Express is different in that it is a secure standalone PC application without the need for an Internet connection and now with our latest upgrade it's also in the palm of your hand. Express is built for our IoT customers who require up to date sensor readings down to the second. Our software has been redesigned to present a faster, user friendly experience for small sensor networks. Your dashboard is accessible from any mobile device and PC, including Mac and Linux. The latest version supports up to 100 wireless sensors and is capable of sending notifications via email when sensor thresholds have been met or exceeded.
