

ALTA® Wireless 500 AC Voltage Meters

General Description

[ALTA® Wireless 500 AC Voltage Meters](#) measure the voltage of an AC power system in volts alternating current (VAC) Root Mean Square (RMS) on user-specified intervals. The meter can measure up to 500 VAC RMS.

Key Features

- ▶ Measures voltage up to 500 VAC RMS
- ▶ Resolution: 0.1 VAC RMS
- ▶ Accuracy:
 - ▶ Uncalibrated: \pm (1 Volt + 2% of reading)
 - ▶ Calibrated: \pm (0.5 Volt + 1% of reading)
- ▶ Configurable thresholds for critical condition monitoring

Principles of Operation

The ALTA Wireless 500 AC Voltage Meter measures the single-ended AC voltage across its two leads based on a user-configurable time interval or Heartbeat. On every Heartbeat, the sensor converts the analog voltage signal to a digital voltage measurement. This measurement is then sent to the gateway, making the data available in iMonnit or another approved data service.

The ALTA 500 AC Voltage Meter can be calibrated for improved accuracy. Also, remember to remove any active voltages from the measurement leads when replacing batteries or performing other maintenance.

Example Applications

- ▶ Power Lines
- ▶ Machinery
- ▶ Electrical Motors
- ▶ Generators
- ▶ Additional applications

Commercial-Grade Sensors

Monnit commercial-grade sensors are designed for applications in ordinary environments (normal room temperature, humidity, and atmospheric pressure). Do not use these sensors under the following conditions as these factors can deteriorate the product characteristics and cause failures and burnout.

- Corrosive gas or deoxidizing gas: chlorine gas, hydrogen sulfide gas, ammonia gas, sulfuric acid gas, nitric oxide gas, etc.
- Volatile or flammable gas
- Dusty conditions
- Low-pressure or high-pressure environments
- Wet or excessively humid locations
- Places with salt water, oils, chemical liquids, or organic solvents
- Where there are excessively strong vibrations
- Other places where similar hazardous conditions exist

Use these products within the specified temperature range. Higher temperatures may cause deterioration of the characteristics or the material quality.

Industrial-Grade Sensors | Type 1, 2, 4, 4X, 12, and 13 NEMA-Rated Enclosure

Monnit's industrial sensors are enclosed in reliable, weatherproof NEMA-rated enclosures. Our NEMA-rated enclosures are constructed for both indoor or outdoor use and protect the sensor circuitry against the ingress of solid foreign objects like dust and the damaging effects of water.

- Safe from falling dirt
- Protects against wind-blown dust
- Protects against rain, sleet, snow, splashing water, and hose-directed water
- Increased level of corrosion resistance
- Will remain undamaged by ice formation on the enclosure
